```
Java
class Solution {
    public String kthLuckyNumber(int k) {
JavaScript
/**
* @param {number} k
* @return {string}
var kthLuckyNumber = function(k) {
};
TypeScript
function kthLuckyNumber(k: number): string {
};
C++
class Solution {
public:
```

```
string kthLuckyNumber(int k) {
};
C#
public class Solution {
   public string KthLuckyNumber(int k) {
Kotlin
class Solution {
   fun kthLuckyNumber(k: Int): String {
Go
func kthLuckyNumber(k int) string {
```
